Stormwater Drainage Maintenance Works—Nissen Street

PROJECT:

This project provides for the maintenance of the twin 900mm stormwater drainage pipes located in Nissen Street, in the vicinity of Bayswater Drive.

The maintenance of the stormwater drainage pipes are being undertaken following a CCTV inspection of the pipes which showed pipe separation resulting in voids beneath the road surface.

PROJECT SCOPE OF WORKS:

The Project scope is as follows:

- Excavation and earthworks;
- Concrete works;
- Asphalt surfacing.

The traffic management plan that will be put in place for the duration of the construction period will allow for the works to be undertaken under traffic control, with traffic lights after hours if required.
