

Kerb and Channel and Footpath Sectional Repairs—Esplanade, Scarness

PROJECT:

This project provides for the relocation of water meters (including releveling of pavers), the replacement of a section of kerb and channel and driveway crossover, stormwater drainage works and the reconstruction of the existing paved driveway/footpath with charcoal coloured concrete in the vicinity of 347 Esplanade, Scarness.

This project is being completed following the identification of areas requiring replacement as part of Council’s annual footpath inspection programme.

PROJECT ESTIMATE:

\$47,000

PROJECT SCOPE OF WORKS:

- General earthworks;
- Kerb and channel and driveway replacement;
- Construction of charcoal concrete driveway access;
- Relocation of water meters;
- Stormwater drainage works ;
- Re-leveling of footpath pavers.

The traffic and pedestrian management plan that will be put in place for the duration of the construction period will be developed prior to works commencing however, it should be noted that pedestrian access will be available at all times whilst the works are completed.
