

## Parking Area and Section of Concrete Footpath—Searle Street— Stage 2 & 3 Works

### PROJECT:

This project provides for the installation of 110 metres of new kerb and channel to allow for the creation of an angled parking area for 13 cars. The works also include the installation of a concrete footpath including associated kerb ramps and a vehicle crossing.

This project completes the final two stages of the three staged project which allows for formalised parking areas to be created in Searle Street with footpath pedestrian linkages from the new designated parking areas.

### PROJECT ESTIMATE:

\$190,000 (this project is partly funded through the State Government's Transport Infrastructure Development Scheme)

The traffic management plan that will be put in place for the duration of the construction period will be developed prior to works commencing.

### PROJECT SCOPE OF WORKS

The Project scope is as follows:

- Construction of 110 metres of new kerb and channel to allow for angled parking;
- Pavement and asphalt surfacing works;
- Installation of concrete footpath including associated kerb ramps and a vehicle crossing;
- Installation of precast concrete islands;
- Line marking and signage;
- Topdressing and turfing of disturbed areas.
