

Agricultural Compost – Specification Sheet

NuGrow converts organic waste streams into high-grade composts, premium soils and soil conditioners that are the ideal complement to civil and commercial projects, agricultural clients, and landscape retailers. Each product is designed specifically to achieve results such as improved soil fertility and micro-life, and enhanced growth rates and yields. They are recognised for their quality and reliability and are preferred by numerous local and national companies for their ability to achieve impressive results. With the strength of our extensive manufacturing operations, we also offer the advantage of reliable volumes.

NuGrow's Agricultural Compost is a great additive to improve the overall health of soils. It provides key benefits such as improving existing soil, the organic carbon ratio, moisture retention, the soils structure and cation exchange capacity. Agricultural compost offers a valuable source of organic carbon and microbial diversity.

- ✓ Adjusts organic carbon ratios in existing soils
- ✓ Improves moisture retention in existing soils
- ✓ Corrects degraded or poor soil structures
- ✓ Environmentally friendly alternative to synthetic fertiliser
- ✓ Valuable source of microbes
- ✓ Can be used as a soil conditioner or composted mulch
- ✓ Conforms to AS4454 & MRTS16

Efficiencies from NuGrow

- Provisions for transport from 3t upwards
- Access to a wide variety of fleet to meet every application
- Fast onsite loading from Certified Weighing Front End Loaders
- Access to NuGrow Revegetation Services for installation of all NuGrow Products and third parties from private residences to commercial infrastructure projects

Each product undergoes laboratory testing and independent analysis to monitor performance prior to market release. We employ the most rigorous testing regime of any compost and soil manufacturer in Queensland to ensure the highest standards of quality and compliance. This industry-leading, ready-to-go testing gives our clients absolute confidence in the safety of our products. Our team also works closely with soil scientists to maintain a consistently high standard.

About NuGrow

NuGrow is Queensland's leader in recycling and revegetation excellence. We thrive on the opportunity of delivering competitive, tailored solutions, driven by our purpose of healthier environments, supporting healthier communities. Our team's focus is true, transforming sustainability; total reliability including operational efficiency and high quality standards; and providing a responsive, professional service for our clients.
