

Bituminous Reseals— Tinana, Maryborough, Granville, Bidwill, Glenwood, Brooweena, Teebar, Boompa, Paterson, Gundiah, Tiaro, Torquay, Burrum Heads, Sunshine Acres, Pacific Haven, Howard and Toogoom

PROJECT:

This project provides for the bitumen resealing of a number of streets in Tinana, Maryborough, Granville, Bidwill, Glenwood, Brooweena, Teebar, Boompa, Paterson, Gundiah, Tiaro, Torquay, Burrum Heads, Sunshine Acres, Pacific Haven, Howard and Toogoom. (A full list of the locations is attached).

A bitumen reseal involves spraying a thin layer of bitumen over an existing old road surface. The bitumen seal protects the underlying road pavement materials from weather damage. A stone aggregate is then spread on top and rolled in to provide the necessary skid resistant surface texture. Bitumen seals are used to seal newly constructed work (gravel) and extend the life of an existing road by 8-14 years depending on traffic loading.

Prior to the appointed contractor coming on-site to perform the re-seal works, Council's Operations area undertakes pre-seal works in areas where this is required and can include the repair of failures and blemishes in the road surface, replacement of the kerb and channel and bicycle grates and the trimming of trees.

PROJECT ESTIMATE:

\$1.4M

TRAFFIC MANAGEMENT:

Whilst the Contractor will provide details of traffic management for the reseal program, normal resurfacing treatment will only impact residents for a short period of time.

The pre-seal works being completed by Council's Operations staff will be undertaken under traffic control arrangements with works ranging from a minimum of 1 day to 5 days in each area.
