

Footpath Construction – Edward Street (Jupiter Street to School Crossing)

PROJECT:

This project provides for the construction of a 2m wide concrete footpath for a distance of approximately 100m on the southern side of Edward Street between Jupiter Street and the school crossing.

This project was identified for completion as part of a missing link from the existing footpath in Jupiter Street to the school crossing located in Edward Street.

PROJECT ESTIMATE:

\$100,000 (this project is partly funded through the State Government's Transport Infrastructure Development Scheme)

PROJECT SCOPE OF WORKS:

The project scope is as follows:

- Excavation and earthworks;
- Construction of a 2m wide concrete footpath for a distance of approximately 100m on the southern side of Edward Street between Jupiter Street and the school crossing;
- Drainage infrastructure to assist with runoff from the school oval;
- Topdressing and turfing of disturbed areas.

The traffic and pedestrian management plan that will be put in place for the duration of the construction period will allow for two-way traffic to be maintained; however, the parking lane adjacent to the worksite in Edward Street will be closed whilst the works are completed. Alternative detour arrangements for pedestrians will also be required.

INDICATIVE PROJECT MILESTONES

June 2024	Final Design
March/April 2025	Construction Period
April 2025	Project Completion

Note: Project milestones are subject to weather and may change.
