

## Bitumen Reseals – River Heads, Maryborough West, Maryborough, Tinana, Owanyilla, Tiaro, Glenwood and Bauple

### PROJECT:

This project provides for the bitumen resealing of a number of streets in River Heads, Maryborough West, Maryborough, Tinana, Owanyilla, Tiaro, Glenwood and Bauple. (A full list of the locations is attached).

A bitumen reseal involves spraying a thin layer of bitumen over an existing old road surface. The bitumen seal protects the underlying road pavement materials from weather damage. A stone aggregate is then spread on top and rolled in to provide the necessary skid resistant surface texture. Bitumen seals are used to seal newly constructed work (gravel) and extend the life of an existing road by 8-14 years depending on traffic loading.
