

GENERAL RATEPAYER INFORMATION 2026/27

This information is a summary of common rates and charges only. Full information and how these are charged can be found on Council's website at www.frasercoast.qld.gov.au/budget.

Disaster Management & Resilience Levy

The Disaster Management & Resilience Levy has been set at \$45.00 per rateable property and continues to be levied for the purpose of contributing to Council's flood cameras, online disaster dashboard, community resilience building projects and the SES.

Calculating Your General Rate

Your general rate is calculated using the land valuation issued by the Department of Resources, multiplied by the applicable "cents in the dollar" for your property's rating category below. If the calculated amount is less than the minimum rate for that category, the minimum rate will apply.

General Rate Limitation on Increase (Rate Capping)

To work out the capped general rate for 2026/2027, Council starts with your general rate from the previous financial year (shown on your Cycle 3 notice), including any capping adjustments given. This amount is then increased by the adopted percentage increase for your property's rating category. The result is the maximum general rate that can be charged for each cycle in the current financial year.

Your rate notice shows the full general rate for your property on page 2. This amount is calculated by multiplying your land valuation by the cents-in-the-dollar set for your rating category. If this calculation is less than the minimum rate, the minimum rate applies. The total is then divided into three to be billed across the financial year.

If your rate is capped, a **Capping Adjustment** will appear as a separate line on page 2 of your notice. This shows the difference between the full general rate and the capped amount you are required to pay.

Notice Example for Reference:

NOTICE BREAKDOWN		
Rates and Charges	Annual Amount	This Notice Amount
Rates & Levies		
General Rate - Category 1b 0.8366c/\$	\$X,XXX.XX	\$XXX.XX
General Rate - Capping Adjustment	CR \$XXX.XX	CR \$XX.XX
Disaster Management Levy	\$XX.XX	\$X.XX

The limitation on increase will cease to apply from the start of the billing period following:

- The transfer of ownership of land, or
- The change to characteristics of the land which results in a change to the differential general rate category applicable to the land (excluding where the differential general rate category changes from non-owner to owner occupier and the ownership remains unchanged), or
- Increases resulting from a property inspection or internal audit, or
- Changes to the configuration of the Land Area resulting in a new registered parcel of land or change in land valuation
